EXPERIENCE

Edubot

June 2025 – Aug 2025

AIML Intern

- Developed a Python-based product demand prediction system using historical sales data, promotions, weather conditions, and seasonal trends to forecast inventory requirements.
- Performed data preprocessing, exploratory data analysis, and feature engineering using Pandas, NumPy, and Scikit-learn to improve prediction accuracy and model reliability.

PROJECTS

AI-Powered Multi-Agent Travel Planner

Jan 2026 – Mar 2026

Python FastAPI, Google Gemini API, React.js, Multi-Agent Systems

- Designed and implemented a Generative AI-powered Multi-Agent Framework that simulates collaborative decision-making for personalized trip planning and itinerary generation.
- Built an AI recommendation engine combining LLM reasoning and optimization algorithms to provide context-aware destination and scheduling recommendations.
- Developed a scalable real-time AI application integrating Google Gemini API and streaming pipelines to deliver interactive and explainable travel planning experiences.

Aletheia

Feb 2026 – Present

React.js, Node.js, Express.js, PostgreSQL, TypeScript

- Developed a full-stack Governance, Risk, and Compliance platform using React.js, Node.js, Express.js, PostgreSQL, and RESTful APIs.
- Implemented observability dashboards, guardrail workflows, prompt versioning, and regression comparison using scalable backend services and PostgreSQL.
- Designed modular frontend components and RESTful APIs to monitor LLM execution, latency, evaluation metrics, and application reliability.

Dockyard

Apr 2026 – June 2026

Next.js 15, React 19, TypeScript, Redis, Socket.IO

- Built a full-stack deployment platform that clones GitHub repositories, executes automated build pipelines, and streams real-time build logs using Redis Pub/Sub and Socket.IO.
- Designed a service-oriented architecture with decoupled web, builder, and request handler services to simulate production-style CI/CD workflows and asynchronous job processing.
- Implemented custom subdomain routing, static asset hosting, and deployment orchestration with scalable frontend interfaces and backend services.

EDUCATION

SRM Institute of Science and Technology

2023 – 2027

B.Tech in Computer Science and Engineering | CGPA: 9.29/10

Andhra Pradesh, India

- Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Full Stack Development
- Research:** Pothole Detection & 3D Reconstruction (Depth Estimation using CNNs); PPE Detection using CNNs in collaboration with UTP Malaysia

SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL

Frameworks & Tools: React.js, Node.js, Express.js, HTML5, CSS3, MySQL, MongoDB, Git, GitHub, Postman

Concepts: REST APIs, Object-Oriented Programming (OOP), Data Structures & Algorithms.

CERTIFICATIONS

- Oracle Certified Professional: Java SE 17 Dev . (Feb 2026)
- MongoDB Associate Dev . (Apr 2026)
